

Supplementary Figure: Dose dependent effect of rHuOVGP1 on protein tyrosine phosphorylation after 4 hours of incubation in capacitating medium and statistical analysis of the levels of tyrosine phosphorylation of 105 kDa and 81 kDa proteins obtained with Western blotting. Samples incubated in the presence of various concentrations of rHuOVGP1 were compared with samples incubated in the absence of rHuOVGP1 (n = 6 samples each from individual donors for each time point, \* $p < 0.05$ , \*\* $p < 0.01$ , \*\*\*  $p < 0.001$ ).
