

Supplementary figure 2. Specificity of Gpr54 antiserum

Western blot analysis carried out on protein extracts from rat testis, frog, rat and human SPZ (A, upper panel). The specificity of reaction was checked by omitting primary antiserum (A, lower panel). Western blot analysis carried out on frog brain (positive control) and testis (B). Gpr54 immunohistochemistry in frog testis of February (C1). Anti Gpr54 specificity was checked by omitting primary (C2) or secondary antisera (C3).
