Supplementary Figure 2. CTFR-sESCs derived from whole blastocysts. (A): Bright-field images from CTFR-sESCs line B (P8) and C (P9) depicting the classic morphology of CTFR-sESCs (Magnification: 10x objective; Scale bars, 100 µm). (B): Immunofluorescence staining for POU5F1 and SOX2 in CTFR-sESCs line B (P10) and C (P13) (Magnification: 20x objective; Scale bars, 100 µm).
