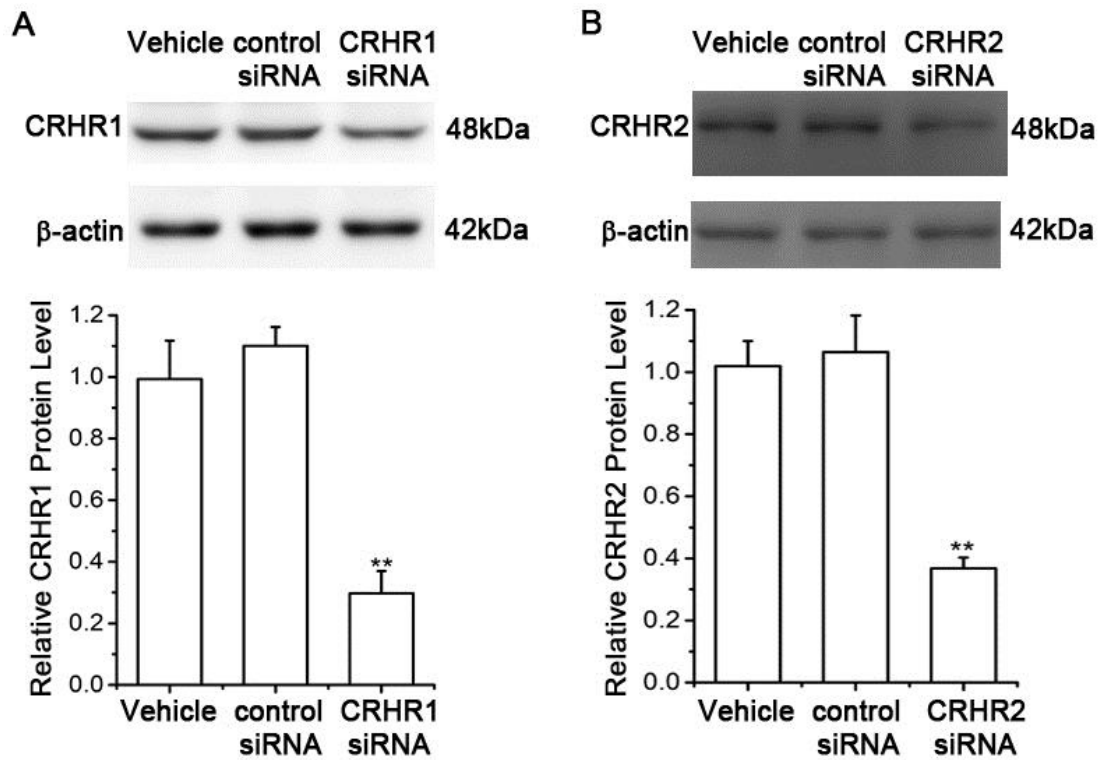

Fig.S1. The effects of CRHR1 and CRHR2 siRNA on CRHR1 and CRHR2 expression in HUSMCs, respectively. HUSMCs were transfected with scramble siRNA and CRHR1 siRNA (A) and CRHR2 siRNA (B) by using Lipofectamine TM 3000. The cells were then harvested for western blotting. Data were presented as mean \pm SEM (n=5 cultures). **P < 0.01 vs control siRNA.
