

Supplemental Figure 1. Expression of 35/77 high impact placenta-enriched transcripts as defined as TPM > 1 in non-placental tissues and TPM > 10 in placental tissue(s). Trophoblast, (TE), inner cell mass (ICM), chorionic girdle (CG) and allantochorion between 45 days and 11 months, postpartum (PP) chorioallantois and diestrus endometrium (EN). Expression of an additional 42/77 genes can be found in Figure 5.
